ABOUT COMPANY

PT. Batamitra Sejahtera was established in 1989 with a strong commitment to growth and excellence in the shipyard industry. Over the years, the company has evolved and expanded its capabilities, positioning itself as a trusted partner in delivering reliable and innovative solutions. Dedicated to addressing the diverse needs of the shipyard sector, Batamitra Sejahtera continues to operate with professionalism, quality, and a forward-thinking approach to meet industry demands effectively.

PT Batamitra Sejahtera not only focuses on operational excellence but also actively contributes to the community through initiatives aimed at improving quality of life and fostering economic growth.

OUR ACTIVITY

PT Batamitra Sejahtera is a leading shipyard company specializing in shipbuilding and repair services, based in Batam, Indonesia. The company focuses on delivering high-quality solutions, safety standards, and innovative approaches to meet maritime industry needs. With activities ranging from constructing and repairing ships and barges to conducting essential safety exercises like the ISPS Code compliance drills, **BMS** consistently demonstrates its commitment

VISION

The vision of PT Batamitra Sejahtera reflects its dedication to becoming a leader in the shipyard industry through professionalism, quality service, and unwavering integrity. The company strives to achieve the highest levels of customer satisfaction by consistently delivering innovative and dependable solutions.

MISSION

The mission of PT Batamitra Sejahtera focuses on becoming a trusted business partner by adhering to professional and tolerant principles. The company is dedicated to pioneering advancements in the shipyard industry by fostering achievement, independence, and high competence. Through these efforts, PT Batamitra Sejahtera aims to deliver reliable, innovative, and sustainable solutions that align with the needs of its customers and stakeholders.

FACILITY

Batamitra Sejahtera offers high-quality products at affordable prices. With extensive experience in the industry, Batamitra Sejahtera has earned the trust of its customers, supported by advanced and well-equipped facilities.

Slipway (1160 M²)

Facilities Supporting Tools

Crane

A crane is a heavy-duty machine used to lift and move materials vertically and horizontally. It is commonly used in construction sites and manufacturing industries to handle heavy loads. Cranes come in various types, such as tower cranes, mobile cranes, and crawler cranes.

Excavator

An excavator is a heavy machine equipped with an arm, boom, and bucket. It is used for digging, transporting materials, and performing other construction tasks. Excavators can also be fitted with specialized attachments for cutting or demolition work.

Compressor

A compressor is a machine used to increase the pressure of air or gas. It is commonly used to operate pneumatic tools, clean equipment, and perform other industrial applications. Compressors are available in different types, such as piston, screw, and centrifugal compressors.

Trailer

A trailer is a non-motorized vehicle designed to be attached to another vehicle for transporting goods or materials. Trailers are widely used in industries to transport heavy or oversized materials that cannot be carried by regular vehicles.

Forklift

A forklift is a lifting machine used to move palletized goods in warehouses or factories. It has forks at the front that can be raised and lowered, making it easier to handle and store goods.

Bending Machine

A bending machine is a tool used to bend metal or other materials into specific shapes. It is commonly used in the manufacturing industry to form metal components with high precision.

CNC

CNC is a machine operated automatically through computer programming to cut, shape, and process materials with high precision. It is widely used in applications such as automotive part production and machine component manufacturing.

Overhead Crane

An overhead crane is a crane installed on tracks attached to the ceiling or structure of a building. It is used to lift and move heavy materials efficiently inside factories or warehouses.

Sandblasting Equipment

Sandblasting equipment is used to clean, smooth, or prepare material surfaces by spraying sand or other abrasive materials at high pressure. It is often used before painting or coating to ensure a clean surface.

Painting Facilities

Painting facilities are dedicated setups designed for the painting process of materials or products. These facilities include enclosed paint rooms, spraying systems, and drying equipment to ensure smooth and high-quality finishes.

Welding Machine

A welding machine is a tool used to join two or more metal materials by melting the parts to be joined using heat or pressure. It is employed in various industrial applications, from construction to manufacturing.

Our Service

Ship & barge build / repair

• Ship Electrical

We offer comprehensive solutions for ship electrical systems, including installation, maintenance, and repair. With cutting-edge technology and an experienced team of experts, we ensure your ship's electrical systems operate optimally and comply with international safety standards.

• Ship Mechanical

Our services include repair and maintenance of main engines as well as supporting mechanical equipment on ships. We guarantee reliable mechanical performance to support efficient operations.

• Carpenter

Carpentry is a skilled trade and a craft in which the primary work performed is the cutting, shaping and installation of building materials during the construction of buildings, ships to make that ship looks good and comfortable to use and sometimes the finer trades of cabinetmaking and furniture building are considered carpentry.

• Hull & Outfitting

We provide fabrication, repair, and maintenance services for hulls (ship bodies) and outfitting (ship components and equipment) with high precision. Our expertise ensures durability and efficiency for ships in various operating conditions.

• Piping

Ship piping systems are a critical component supporting vessel operations. We offer installation, repair, and replacement services using high-quality materials and precise workmanship.

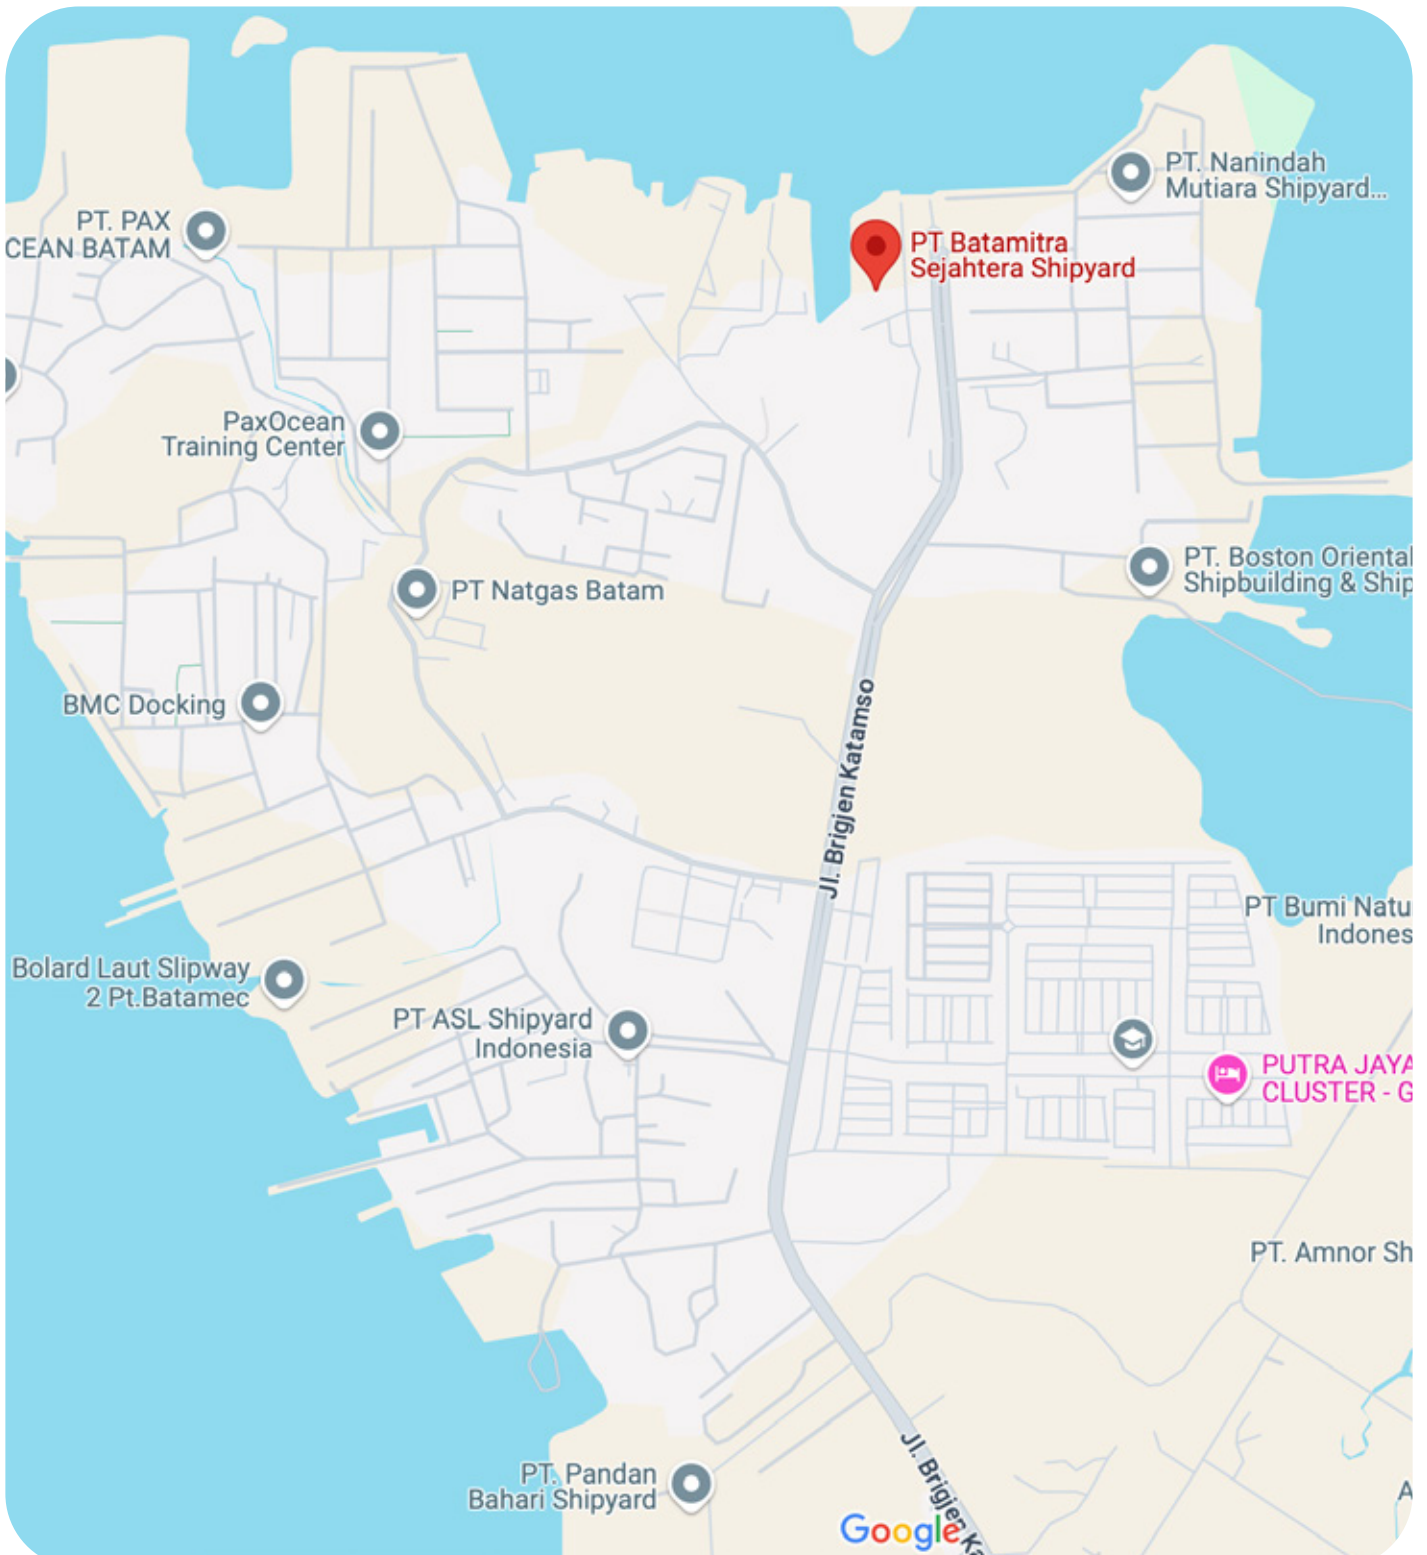

• Blasting & Painting

Using modern sandblasting technology and advanced painting techniques, we provide maximum protection against corrosion and extreme weather conditions. These services not only enhance the aesthetics of your ship but also extend its lifespan.
